

Hanksville Aug. 18th 1928

To The State Engineer's Office
Salt Lake City, Utah and
To Whom It May Concern:

In RE - Bowl creek!

This is to certify, that I, F. J. Weber at the request of V. W. Pace, have made measurements on the following dates to ascertain the flow of water in Bowl creek and submit herein these findings:

That on June 18th, at the point of diversion, about 3½ miles from Pace's ranch, we constructed a wier, and found that the flow of discharge over a two foot crest was six inches high, approximately about 2½ second feet of water in said Bowl creek.

And again, on August 18th, (3 days after a heavy rain) at the same point of diversion and over the same crest in said wier, a discharge of two inches high was found.

And further, I herein say, that the foregoing is a true and correct statement, unbiased to anyone, who may be interested in this matter.

Yours truly

F. J. Weber
